Transcription

Three. Two doctors, one social worker. Simon, it's not going to work when you are talking outside. You look special.

Simon. No, no. Very well. Stop. All right, can you shut the door? Shut what door? That door. Hold on, how do you turn this down? I'm turning it up. How are you doing? Welcome to my home. There's a few of us I'm afraid. Where's the best place for us to all sit? Take a seat anywhere. Everyone is welcome to sit anywhere. There's seats everywhere for everybody to sit down. Then we'll explain why we're here and have a chat. How many people are actually coming in that's raised to go this way? I'm not impressed with the way you're using your mental health powers to obtain a warrant coming to my house under false allegations.

No, no. You're really not. You're stating facts that ain't correct to obtain it. You may take a seat anywhere. You're welcome. You're welcomed in now. You may take a seat. I'd rather you not take a seat than I take a seat. Okay, let's head to that. Take a seat, sir. If you're comfortable standing, if you don't mind. Can we just leave the door open and have the police at the entrance? Is that okay with the police officers?

Okay. Everyone inside is a mental health professional. That's correct in practice and that's how it should be. That's professional. Right now I've got conflicting cases going on with the police and I don't know what's going on. Okay. So Simon, the reason we're here today is because concerns have been raised... About your mental health and we've been asked to carry out something called a mental health act assessment. So we're here to decide whether or not you need to be detained We're going to perform an emergency after. I understand your pursuit. In order for that to happen, and we've not decided anything yet, that's why I want to talk to you. Let's just explain the legal situation first, then you can do your work. So myself, two doctors, so there is Dr. And in order from medical recommendations and I would need to agree. But we really just want to find out about mental health today.

- And so who are these people?

- These are from the--

- My name's Saman, I'm from the mental health team.

- So I met you the other day and I spoke to you on the phone. I've got large concerns about yourself because this is how I'm gonna prove that you put the statements of back then to get this. Yesterday I spoke to you and I spoke to you a couple of days ago and did I not say to you and you said to me at 14:22, I've got you recording, I'm going to play your voice to you in a second. You don't need to do that. So now I'd like you to be honest, did I not say to you that you were allowed access to my house whenever you would like on the phone last week and the week before? Yeah, yeah, and that's great and you'll know. So how has this call board

been obtained under the grounds that I've not gave you access? The form has been filled in and when you're filling that form in to get this court order is supposed to be filled in as a statement of facts that's said under oath to a judge. Someone has filled that in incorrectly and you just blatantly admit that I've said that to you because I've gave you permission to come into my house. So that court order is a breach of violations. You've got a warrant to come into the flat. No, the warrant itself is valid by a judge. Shall I say something? The fulfillment of the warrant is incorrect. Am I correct in practice, madam? You have said that I can come to the house. The issue is seeing the doctors. We came last week and you didn't allow us to... Hold on, can I actually say something? Two days before that, before you attended my premises, for a month I had a gentleman phoning me called Goody. I was speaking to him, he was making good relationships I like the person's attitude I like how he was talking to me and I thought maybe this person might be able to help me prospect and go forward in my life so we're building good relationships we arrange a meeting for him to come round to my address he says okay he's coming round he says he's going to bring a friend a colleague I said that's perfect he brings Sandra with him they both come into this house I invite them in perfectly, my house is tidy, it smells clean, they check the fridge and that. So they sit down on the chair, Sandra sits exactly where you're sitting today Elaine, but two minutes later her phone rings. She gets up and she walks into the hallway and she's on the phone in the corridor. Sitting here. I talk to Goody, I show Goody my business plan and I start showing him things that I'm doing in my life and things how I'm going to help this community and I'm going to be a good tenant and resident and citizen of the United Kingdom. He's happy, he's going, I'm amazed, I'm amazed Simon to see the good things that you're doing and to see all the management systems and all the files that you have here. Two minutes, five minutes later the woman walks back in and she goes, Goody we've got to leave So she stops the interview that me and Goody are having personally and then they leave the premises. Two days later, Goody says to me, I shake Goody's hand, Goody says, "When I get back in four weeks, I'm your case handler, Simon. I'm going on holiday. In four weeks, I'm going to come and I'm going to visit you in four weeks." I say, "Goody, that would be nice to see you in four weeks." yeah two days later yourself Elaine and another and I'll turn back up to my door the woman that was so rude when she come in and cut our in and I know she never read no no Stan she never took no information damage you're gonna know I speak to yourself I said I explained to you visitor come into my house and I don't want them to know my personal life. Right now I'm trying to make a good impression of myself to these people. I'm showing them that you're doing here, this could be a business prospect or business chance I might be having in the future. So you might tarnish that chance for me. Yes, by being here. So please can you make yourself announced when you're going to be turning up to my address. I think I didn't explain to you that I was into threat He has allowed you access, he's allowed two sets of doctors. Not to me. No, but he's allowed two sets of doctors. But let us be them speakers, he's going to listen to me, go on sir. I told you I'm an independent psychiatrist and we were there to carry out a mental health assessment and you insisted that we only talk to you outside and you didn't want us to come in. But should you not notify him beforehand? They don't have to and the AMP don't have to do that. The AMP don't have to do that because they're two separate bodies. I think if you've got complaints about what's happened up to now, that's fine and by all means you can make them. It's not just complaints, it's you are in my house right now under a statement that this woman has clearly just said to you has been filled out wrongly and been handed to a judge to breach my private and family living... This is my private and family living... She's admitting that's been fulfilled wrong. She's admitting that that's been fulfilled wrong to breach my human rights. What I'd like to focus on is your mental health at the moment and if you need any help with your mental health and what's going on for you. Can we talk about that a bit, Simon?

I'm happy to talk to you and agree to yourself and I'm happy to go through this. Because I've heard that in your... About your mental health.

- My mental health, I'm on good health right now. I'm on good, I'm on good mind, body and soul. Right now, if you'd like to see the work that I'm doing, I'll show you what I'm committing myself to every single day. I can show you what I do myself. I feel a bit of offense for the way that things have gone, 'cause I was building good relationships with Goody. They're two separate departments, and one does need to refer the other one to yourselves to come into this. Sharon has not been-- - Sharon.

- Sharon has not been--

- No, Sandra.

- Sandra has not had-- and the manager and Debbie's the manager on the other side. They didn't have the correct protocols in place to be able to force Sandra to go and get this call. Now I know a lot of strangers come into your home and it's a difficult situation. I would speak fast. He's frustrated as well. Is this the usual self? This is how I would find myself. This is how I explain myself simply. If I find somebody that's of a higher profession and gets paid a living wage the same as you do and when I've got the education it took to be able to look after myself or another member of the that it took you to do that and the hardship it will take for you to get to that stage. So I know myself, I am educating myself and I'm a lower education to you. So I believe that you should be able to understand and keep up the pace. Your time is valuable to yourself and valuable to me. So I want to use that to its most efficient as possible. If you want me to slow down and speak to you a bit slower.

- If you could slow down, because it would also show us that you're able to be calm, because that would help us understand your mental health at the moment. It's not because there's a change or anything like that. I might be a bit more chirpy in general but obviously this is a difficult situation right now, I appreciate that. What is a difficult situation? The only difficult situation is that this is being piled up onto me in such a way when I'm sitting here right now every day working my hardest right and files to look after every other member of the public and I'm being treated differently. I'm an equal to yourselves and we're all equals. We can understand all that. We can understand all that. But there is concern raised about you. That's why we are here. To assess the situation. To see how if you needed any help, if you could offer any help. That is the reason why we are here. How is your sleep? So there is concern about you and that is why we are here. But why would there be concern for me if I've not spoken to my doctor in use? Users are the only people that seem to have that concern and that concern is based on this gentleman who's come to my door and I've not gave him access. No, no, no, before that, before that. Before that, the main concern was that you come here on the 8th of December There was no issue there. I explained to you that everybody was comfortable and you all left me. And if there was a concern, you would have raised that yourself as a confession. Tell us about your neighbours. Tell us about your neighbours. I've

got letters of every single one of my neighbours here right now. I've got a letter of my neighbour next door. I've got a letter of every person here saying I've lived here for 11 years. We've been allowing you to talk, so please, when we talk, listen to us and then we... So there is concern about you regarding the neighbours. You feel that the neighbors are harassing you in any way? No, no, no, no. Let him talk, please. The only issue that I've had with my upstairs neighbor is that she is under your team of assessment. She accepts money from you, and she's supposed to have a network in place such as yourselves. Now I've been living in this house for 11 years. She moved in here 7 years ago. She came here, she was already an alcoholic. The alcoholic takes over the perception of her mental health. She was paying for herself medically to be drunk. She was going to an alcohol panther. She wouldn't get a liver transplant in these situations. That's why she no longer really gets much assistance at the age she is of herself, I suspect, because there's other people that deserve the chance a lot more than what she does.

Have you had any difficulties with her, like conflicts?

I picked her up, take her shopping. I'd have her stuff coming in and I'd lift her up shopping upstairs. I would see her going up, carry her up to her house, I'd see her and I'd always be polite to her, say hello, blah, blah, blah. I would lend her a tenner. I'd never let her in this house because I could feel something was wrong with her. She used to knock on my door every day. My last girlfriend used to be so paranoid for 30 years because of the amount she was knocking on my door and her being another female. But I've never let this woman into my house.

Have you ever had any conflict with her? Have you ever threatened her?

I've never threatened her. I've got letters of her in there saying I'm the best neighbour in the world. I'm going to show you. Where from? He is having some problems with her in the sense that basically she won't leave him alone. He's going to let us through his doors. And basically I have been trying to deal with the council with that and there's a years worth of emails.

What's the content of this letter?

I've got them all here. She's sorry. She's sorry to keep banging. Your burden is with her. To resolve the problem or any conflict that may be here would be to go to her and understand. You've got to pay her to be mentally ill. And that she is mentally ill and that she now dreams...

- Are you saying that paying her to be mentally ill?

Government to be mentally ill. So she hasn't filled out these forms and got them accepted for having a sane sanity in today's public. Her drinking on top of that was always an issue, so I'd always regulate her drinking if I had anything to do. But she knocked on my door and asked me for something. But she used to bring you alcohol.

No, she never brought me alcohol. She has before. Why she put me up? If I ever did, I'd pick him up for a drink or anything of any sort like that. I don't drink alcohol. You don't drink alcohol. I don't drink alcohol. You take drugs. Right. You never accept it. I look after him. I want to look after him. We understand that in the past you had some, I think, depression and you... I'm not specifying your anxiety. No, no, I'm talking about the mental health issue.

So you had depression in your body?

When I was a kid, I had a hard upbringing in the north London end of it. But as you can see here right now, I've worked hard to keep myself afloat, keep myself clean, keep myself everything I need.

Have you taken any medication? How was your depression cured then?

How was my depression cured? I met beautiful people into my life and they told me along the road. So you felt like that. And then somebody else might go, somebody else knew, come and help me. But they took people away for years.

And recently have you been feeling low and moved to Christ?

Recently I've just wanted to get my civil liberties replaced because they've been tarnished by the police. Section 63 is what they... I was basically, to a degree, what they've done is they set me up for being with friends, two black boys. Yeah, funny enough. Yeah. And they knew that I couldn't have committed the crimes that they're accusing me of, but another police officer also knows this and he's come in as a witness. A superintendent's come in to talk to me. What crime are they in? They're serious issues. They're in a lot of trouble. We're not here to talk about all the criminal... We're really concerned about your mental. What I want to do is ask you some standard questions that we ask everybody to help us understand your mental health at the moment.

Have you got any racing thoughts?

If you find your thoughts came very quick, working every day in my business. If you want to see that I'll show you.

How is your sleep at the moment?

I sleep perfectly. Eight hours a day, sometimes nine. Sometimes I'll stay up late and then what I do, I tend to work sometimes on the computer better at night times when it's quiet. I'd stay up a bit later at nights but then I'd come back to the daytime make sure I manage everything, make sure that all my paperwork's in correct order, the things that I need to do then I can go back to my place of work and my place of comfort which is there sometimes.

How is your appetite? Are you eating okay? And are you in any particular low mood at all? Have you felt down?

I just want my civil liberties given back to me. It's a bit stressful that you're going to the court case. Has it I basically won my case in court, and I won it in court, and the judge knew I won it. Because the facts of the matter is that section 63, you must have trespassed, is a key element for that law to exist. I don't have trespassed on my criminal record. So I explained this to the judge, so she said, "Do you know what? You're right." She breached my human rights. She told me that there's no difference between private and public air. No, no, what she actually told, her exact words was, was that basically the applicant, all the cases, on illegality by the act.

- They've darkened my name in the newspapers and the rest of it.

- Yeah, yeah. And I've just gone back to the police officers to let them know everything was all right. So the other thing I wanted to ask, so if you felt any thoughts, I know you're stressed at the moment, has it affected you to the point you've felt life's not worth living or anything like that?

- 100% I've felt, I just want to continue, with all the things that I'm writing, and I'm gonna show you what I'm writing, then you might be able to say, "Okay, Simon's doing whatever," These are all the things that I'm doing in my life. I've just been building a management system, getting everything I need to be able to look after a festival. I've been building my own constitution, learning everything I need, getting all the systems that I need in place, all the health and safety files, all my food safeties, all the files I need to look after any other person, like all the support programs that are in the areas and stuff that can be done. Everything's all categorised. I've got all my adults and youth, all my congenital, I've got everything I need, I've got all my disability rights and all the rest of it.

Can you tell us what exactly your work is about? I've built a festival and I've built a website and that website is going to, basically what I've done is I've built a company for myself that I can manage which is a warehouse and I'll be able to do seasonal accessories. But at the same time I built a charity and I basically got the business directory of it and what I've done is I've written a constitution, I've written amendments to articles of association and basically what I've done is I've defined different people in different areas so rather than just having a

community hall that someone in government would sponsor to the general public or to somebody, to a team of people, beneficiaries, I've made it so that I can use my website and I can have six different beneficiaries - Thank you so much, Farron. - What do you mean? - I mean like an income. - Yes, I have been, I have been. Well, slow little pieces, but I got shut down by the police. As I explained in the transcripts, I got a judge saying to me that I have to have permission to have a private party in my house. I need to get a print. - These conditions stop you from-- - Sorry, does anyone want a cup of tea or something? - No, I'm fine, thank you. - No, thanks. - Thank you very much. - Sorry, that was very rude of you. What do you do with these big printers? I'll show you now, let's see if we... You know the sign writing that you stick on bands and... Oh, it's like posters and things. Yeah, posters and all that. Yeah. It's not for that. What I've done is I needed to read... I've got my catering trailer and so forth like that which is for my catalogue which is over here. Yeah. There's loads of sections. It's a bit hard to go through so it's easier just to go through it and plan it yourself. This is what I've been doing. This is the formation to the company which says so to the commissioner. I just don't like being out there when everyone's in it. Lady! Lady, come on, be a good boy. Go. What it does here, what you do is you have, this is the form that you have, I'm going to show you quickly now. What you have to do is you have to fill out this form here. Now what I'm doing is I'm letting six other people help manage my company. Now normally you'd have about six people defined in one area, which would be just this area. But because I've got the internet, one for this estate, one up in Sa, one there, and they're all managing it in different areas. So that does basically make it that I have a constitution and define what sections I want. Because I'm not governing just one building and one place and saying, "Well, I'm going to do these things." I've done the whole of the United Kingdom. So now I've got six people that are not directors, access to a section of my business direction. Now what they have is they have the power to give the rest of the residents on the estate a login. Now they can all login and what it has is a Facebook clip and then they can click on that and it will send people to be a donor to that cause. So basically one person to each, say there's 33 borrowers in this area, I'd have six of the borrowers. That are directors. So this is one of the boroughs my mum hopefully will be one. I'll be one for this estate and then they'll have another one for another area, another one for another area and they'll have loggings.

- There's a way of expanding your business, is there?

- No, it's not expanding my business. What it does is it expands the business for the community. Not for myself, because what I do is I give this to it happens is it becomes all real property which belongs to the beneficiary which is the Commissioner of England and Wales this is who I'm writing this to now asking him this is my proposal to you this is what I've built and this is how I want to help the people yes and this is what I would do be one of the first people to go on the internet I'm going to sponsor my business directly to the people and that's how I move on. And then what's the benefits of this business to the people? I'll show you. What they can do is they can come along and they can add a business card to a business directory so they can show other people their businesses. New starting businesses, existing profiles. Here, let me show them the website. Then you can show them the business. If you'd like to take a read-through, it's not something that takes five minutes. It's a lot of work and a lifetime of work to be able to build it for people. Something that's the reason i'm really i'm so something that the people are helping people they want to achieve but she was at the same goes on the street today and i'm not alone I had to meet with Goody again. I didn't go to him. I wouldn't be able to meet Goody again. It depends on the background. Is he not

on leave at the minute? I understand. I think the balance of all my two-year-olds is that he's on leave at the moment. Other than the fact that I'm a good person doing correct things. You'd already agreed to meet Goody again. I've shown you some good ones. I've got a little bit more, sir. You seem interested, Simon. A lot of people, when they're interested in my work here, I just want a little read of it. This will explain the rest a bit more to yourself.

Two smooths of business directory and next member's objectives are to benefit residents. Have you actually shown the website, Simon? You probably understand what I'm saying. Have you seen the website before? No. I'm going to show you the website now. And I'll show you.

Events like um yeah i've done a couple of these uh for this but this is what's wrong with you this is a charity that i've been building like you've done for the same but this is what i've been building for bliss that i've been trying to look at this like this is all the stuff that you need for any charity this is all of their charity tax what i own is a limited company which is two Now what I want to do is I want to be able to, that's an umbrella company, I want to be able to maintain my limited foundation under that. The benefit is for the community, what they can do is they can advertise, it's a business directory like one more name. And what they can do is you can come along and you can advertise your business card. What you do is you can pay a set fee for it but that money will go to a charity bar at the top and it goes to the local community. So I'm just going to ask a few, I know this is a hundred and one questions, you've got all these strange things in your living room, but if I could ask a few more questions. Do you ever hear voices when they're all around? No, it's just a split. And the police, I know you've got these ongoing court cases, and I don't want you to talk about the specifics of them, but do you? These are the letters of Debbie, we're going to go through a couple of them with you in a second. So you can just soak and see what's in them. Look at this. The National Corps Centre is a really important centre. And CCC should not, the timestamps can't go backwards. For a start, what colour am I? And everyone asks me what colour am I? Mixed race, would everyone agree? I'm mixed race to light skin for a start. This is a 999 call and this is what I've been doing. Call the states, there are 20 people calling each other. I was in this house on this day, you know. I've never done it. I've never done it. I haven't done nothing for years. Call it looks like they're planning to have an illegal raid. Call the states, they are booking alcohol and debt. All the states, you can see them bringing in really quick talks, please stop for a second, all the states, you can see from boxes into the buildings, states that they've different, all the states, they are all males and females and they're all white people, all white people, so that's impossible for me, I'm mixed race, so that's one quite bad thing here, but let me go to something else that's even worse, which is a big Sam, can I just talk to you? He's coming in, he's trying to talk about his defence in a court case. They're not allowed to hear it. I just think the police are like, "The door's shut." So perhaps it's better if you don't talk about the details of the court case right now. Leave the door open, and then we'll talk about something else. Because the police just have to keep an eye on things, that's their job. He's not a violent person, he wouldn't do anything to me. He's a lawyer. Can I actually see a copy of the warrant? Can I have a copy of the warrant as well please? We'll leave a warrant copy before we go so you'll have a copy. If I've got any questions on it I can ask them. It depends what team. There's two different teams. There's two different teams here. There is no use in undernourishing. I'm as sane as any of you out here. I'm more sane than most here. I'm more intelligent than most people I meet. They're not going to see you forever. They're going to tell you what to do. And what sort of regulatory rules are we talking about?

They will talk to you about what to do. They will see you. I'm not going to lie.

How many regular interviews are we talking about? Once a week, once a month, once every three months, once every six months? Once a week is a bit... Right now, my time is valuable to me, but I'm trying to study and I'm trying to do this. I mean, I think one of the reasons that you've got all this unwanted attention from mental health services, mental health services don't feel... That they've had a chance to assess you and going to, having a few meetings with Goody or whoever it might be would at least give mental health service a piece of life. Do I have to go and see Goody or does Goody come and see me?

I would, now you're part of the team. It could be either way, Goody could come here or you could come here. And then what this is, this time this is my medical record and when people want to see me looking after other people in life when I say, because right now I've got the cleanest name in the world, apart from the police, dark and white, on the website and said that I've been found guilty, which I haven't because I've got the transcripts, I'm going to prove that in a couple of weeks. I'm going to have a clean name.

Is this a different site?

There's a difference between people carrying out an assessment to see if they've got mental health problems.

Yeah, but this is an assessment now, but now we're talking that I do have a problem and now you want to have...

No, but what I'm saying is in order to have a proper understanding of whether or not you've got any illness, they need to see you a few times and maybe meet a doctor and it may well be at the end of that they say there aren't any Do you understand what that would do to your career if someone done that to you right now? So understanding you were doing, how good you are and all the time you've done. If someone come along and actually just done that to you and to your liquid, to your rest right now, yeah? Then you'd, that would tarnish the rest of your career possibly. And you can't do that to me if you understand how hard I'm working right here like that. I'm working hard. I can see you've got a really strong business that you work at. What if there's a difference between being assessed, being checked in your OK, and saying... All I'm saying is perhaps have a meeting with one of the doctors in Goody's team. Because doctors have a specific skill to do a proper thorough assessment. That's what you're trying to say, you're intelligent and you know you're going to lead me. And you're going to know that I'm healthy as well. Well I think it's not just in your wants, in your couple of times over a period of time. Can we do an assessment at least once, maybe just another assessment, what you're telling me is it ain't going to tarnish the rest of my rest of my life.

No, because it may well be that the couple of assessments...

Simon shouldn't look after 50 kids today because he's slightly mentally ill. But it's Simon not having a diagnosis which is something...

No one's diagnosing you with any mental illness at this point. There's been concerned draids, so it's just a matter of people wanting to do a thorough assessment. This is part of it, but I think we'd like to, after today, is for you to see some other people... I'm going to take your advice, won't I? I'm just saying... I'm just saying... You could be discharged from the service. If the team follow you and see you for public... I don't know for how long... Because if you don't see people and they've just got these concerns, and people just worry about you, you don't have a cover. There is no reason to worry about you. But it's just because they haven't had the opportunity to do before assessment. I've got my court case coming up soon. I can't wait to prove my innocence and finish the rest of what I'm doing and put everyone away. I think... Once justice is done, I'll be happy in my head and eye. So this is very simple. Most likely, most likely, most likely actually, you'll be discharged at the end of this if they cannot put that mental health... But if anyone phones my health services in the future, they can look, they see there's been a proper assessment. Yeah, okay. What I need to do is I'll just have a quick chat. He's never had any qualms in his life. I'm 35 years old and I'm not having any qualms. It's just how you're going about it. You go about it the wrong way, you're going to be defensive.

Yes, and I can understand that people coming in your room is a really negative experience of mental health. It's not just that. I just want to finish over.

Okay. It wasn't necessarily... We are at the police tonight, so we are on the east.

No, well I walked into this situation for the first time today. So you don't know anything about this?

What I'd like to do is just have a quick word outside the doctors just to decide what we want to do. You can come back in and let me know which will take a couple of minutes.

Okay, okay. So I'm just going to pop outside the doctors for a couple of minutes and then we'll come back in. I'm sure it will be safe here. I'm not for a little while now. I'm just staying and relaxing for a while. But I'll pay for the assets we had to sell when I need some money to get some construction.

Simon, my name is Nelly. I'm one of the senior... Senior practitioners in home treatment. Both of us work in home treatment. It must be a hard team to work in.

You know, I have a quick question. Yeah. Due to the conditions he's been put under by the police, he won't go out because he feels that he's not... It's constant, they're constantly harassing him. He's worried he'll get... So he won't go out until all this appeal's over with and everything else and he starts getting his life back. He's got an assessment tomorrow for ESA. And he's not going to go up to it. Is there anything for mental health and action to do to prove that he's not, you know what I mean, like write me a letter or something or anything? Could you write on that and demand a copy? It wasn't executed and he allowed you to enter it? You get a sentence, I suppose we could say, and then we'd just send it back to the court.

Yeah, but can I keep a copy of it, please?

Give you a copy.

Wonderful, thank you. Would you use that like a drink?

No, thanks. In answer to your question, and I don't have a clear answer, but... No, no, no, it's not. Basically, the condition... He's on six conditions at the present moment until this goes to appeal. And it's basically... It's technically not a curfew, basically, because he's not allowed to go to places. Like, to go into the... To go into the... I've been locked in here for three years, though. They won't let me out in three years. I've not even been found guilty or arrested. Look at this thing. He's got an appointment tomorrow. I have contacted them and said that it's going to need to be rearranged. Caledonia is going to need to tell them today. This was just a direct contact to them. And basically they've asked me to update them today as to what's going on. They're open till like what, tonight? Where is it at? Where is it? Highbury, isn't it? It's probably in Highbury. Oh, it's in Lincoln. And they're closing around for the day. I'm part of the World Central, aren't I? I can't go to McDonalds, I can't do anything. I go into any nightclub I need permission, any nightclub, if I walk into a house party and you've got more than 20 people in your house, I can go to prison. The problem is, normally you've got private land, public air and private air. I've got freedom of speech in this house, this is my private air. And that's what I believe in, this is our civil and our rights. Now what they've done is, because these buildings or whatever's going on are inside, really, they're treated as people's residence and place of living. So now what they're going to do is breach my human rights and breach all the rules and regulations and say that private air and public air are the same. And that's what they've had to do to give me this application in a sense. Now what the judge has written, she's written, I'm not allowed to have no private birthday parties in this house. If I give you an amp and you take an amp to a house, if you have 20 people listening to music in your house with that amp, then I can go to prison and I forfeit for your actions. They literally say 20. Yeah, 20. Now that's... Within the election on the 16th of December.

- But they're not allowed to do that in a house. In a house, I'm allowed as many people as I want. Yeah, I'm allowed, normally, you're allowed as many people as you want in here.

- Define it and--

- Their laws only really protect outside, not inside. But all of a sudden, they're using the protect inside to do more.

- They'll be sorry.

- I'm standing up for everybody.

- It's absolutely wrong.

- I'm standing up for everybody.

- There's an appeal, - Is your own place? - Yeah. - Is that section 63? - I don't know the sections, I just know what the S-bone counts. - Simon, I'm sure you'll be pleased to hear that you're not going to be going to the section with an N-12 back today. - Yay! - You're not going to hospital. - Sorry, because if he asked for it, he can't get it. What we encourage you to do is to meet up with Goody and see the doctor and Goody's team because I think what we really use for, if we've got something on file to say there's been an assessment, no mental health illness was found, then next time someone phones up we've got that on our record because if you get some contact to say there's concerns about mental health we have a duty to go and check what's happening. So having the assessment, getting it out the way. I know that you said that, but this is exactly the point I wanted to raise upstairs. She has... You've got duty... Your team does have duty of care, okay? These are the letters that she's writing me. I was in a 13-year relationship, yeah? And she was stalking me, following me around. But it never paid too much bother to me because I didn't have these orders on me, so I went in my house and was like... Eventually, anyway, I broke up with my partner. And I was laying on the sofa and this woman kept writing me letters all of a sudden. It shows how clearly drunk she was in her mental state of mind in the letters. She was like, "Dear Simon, I thank you for your support through my alcoholism." She was playing me and I was like, "I was aware I knocked on your door and borrowed approximately seven pounds." eight times. So you can see I'm always giving her money in clothes so I can see how she's talking to me. Wait, that's because she's asking for it. She's not going to do it. She's like, I don't have the means or ways of knowing or stalking you. So she clearly understands that she's stalking me and I'm saying, please can you stop doing what you're doing. She's writing it when she's drunk. It's an intrusion. I'm not a care worker, but now I'm spending 24 hours in my home. Do you know what she does? So she comes here, yeah, and she gets this tap. The manufacturing intended it to be built for a purpose, and that's not to make that a show. What she's doing, she's sitting there at the tap, and I mean she does, she sleeps at the tap. What she's doing is someone has turned the pressure on the copper head. - 26 and a half, nine, one.

- Do you have seniors to tell us this?

- Not my team, no.

- She's sitting there, what she does is, I can't take my clothes off in this house, but she was standing in front of me, bang, bang, bang, bang, bang. All the way into the bathroom. We've got so many witnesses. I've been trying to get a handle on it. I'm assuming the housing officer's aware. The police won't do nothing. I have been trying to deal with it. I've got emails upon emails that I've sent begging the council to deal with the load. Even when I'm in, she forms me into a bathroom. One of my friends can have to take their clothes off in this house or nothing. It feels like she's constantly on top of your brain. If she needs to be in touch, the keyboard, yeah. I can't work in this house because of her. And I've been sitting here for the last year still, just waiting on her. And I've got emails upon emails, asked in the can, asking to address it, because it's not fair on him. He's got my privacy in his own arm. Look, Simon, thank you, I think absolutely, yes, I believe you and Ben know you're not to make your misery of your life. Sorry, I can't see making my life a misery. Leaving just the wedged headboard to go and then... No, that's not drunk, she's going to leave it on the floor. But do you know what she did with the wedged headboard? Like I said, that Christmas, last Christmas, I bought her a box of chocolates, yeah? And I gave everyone a present, yeah? Times were hard for me at this time. I hadn't been up too much because I'd been on 33 for two years at that stage, yeah? And this has. So I bought them their boxes of chocolates and she's doing all this and then a couple of months after in February last year she started doing all this stuff, started doing the pendulum taps and throwing me a stand in She knocked on my door and then asked me to go upstairs into her flat and help move her bed out. It's the first time I've been into her flat in years since she's lived there but I said okay as a gentleman and went up there. I went into the house and the house was clean but it was still smell clean. So I thought like I'm one of those people, someone's coming in and I'd like to make the house some new. So I thought a bit like how did she bring me in her house and I quickly moved the bed whilst in and undone it and then went out the house and got out the house and got back to my old house. So that's why she writes that funny bit in there about the head wedged. Look at this, "Think I've sorted it Simon. Yes I believe you would bend over not to make him like a wedger in your life. So I can't see you making my life a wedger. Leaving just the wedged headboard to go, let me know you've been the best neighbour in the world ever." And these are the letters she keeps hitting through my door. Even the council as Tarana said, that we believe she's got an affectionate relationship with my son. They're not doing nothing. And it's driving him. He can't even go into the toilet and have a bath. And she's on top of him and she's banging constantly. I mean, even when I'm sitting here, I go to the toilet because she doesn't know it's me. But she goes, and if you can't make it feel like the council is really not doing anything He knows she's got a problem. And it's been going on for a long time. Yeah. And I put a complaint in. The council put it, because Dawn Allen is his council officer. I was making fun of him saying to Dawn Allen, please try and address this. You know, please. You know, he's coming through far now. Yeah. You know, and she wouldn't come out, she wouldn't deal with it. I wouldn't go up there and visit her. And then basically, I put a complaint in, and then they said they're going to put it over to the antisocial behaviour team. They weren't doing anything. They didn't try to do anything. Then I had a case of the Louis Frange case of the months of not doing anything and I'm writing emails upon emails and then they come out and she didn't take one note and he's got video recordings and everything of hearing it and you can, the taps, where she was shooting the taps and they had the pressure up so high, the noise that come in his How old is she? She must be getting very distraught. She's about 12 years older than me. She's about 12 years older than me.

- The reason she said that was because they told me on the page that loads of rubbish.

- And like, I put a complaint in because the anti-social behaviour team wasn't dealing with it and they weren't taking the issue seriously and that was put in in October last year, I haven't heard a thing. So I keep asking them, when are we actually gonna get a response from the complaint I put in? You know, you're not addressing things correctly.

- Of course, we're taking a chance there, but we're not. Nothing. She actually found, I think she made a mistake, because he found Louise, I mean she was coming off as continuous, she was really gagging, and like, a good work wife, it's annoying to me. So he found Louisa, and... He always gives out my number. So she actually phoned me by mistake. And I turned round and said to Louise, I said, "Is Simon called Dodo?" And I said, "No, it's not. It's not Louise. It's not. She goes to Louise's brand." Oh, so you know me from after that. So could you tell me why you have them? It's something to my formal complaint. I'm sure you've had it. And I'm not going to play a tenorise to a judge. Oh, I haven't. Please do. In another email, I was late for the email, and she said, people have a response. So when I read that I was like, it's still going on that, it's still nothing. I'm a brilliant writer. It's a text format, it's a dictionary. An IV from being up, like the scene that he talked to a couple of times, he was constantly banging, banging, banging the counter. It's adjusted. I don't hear it so badly, but even the other day, he had all of his bathroom ceiling all flooded, the whole of the electric was blue and basically he had to call the emergency. He went upstairs to say to me, you've got a leak and it's all flooding through my bathroom. And then the plants will come out and then She, it seems as though she's cleaned the mess up. Yeah. And basically they've relayed the whole of her pipes, right, they've relayed his heating because they was having serious leaks in the properties. So they've, with the heating system, so they've relayed the pipes over the whole. And basically, he turned around and they turned around and then they phoned me and they said, "Has the ceiling dried out yet? We need to..." Because they had to disconnect the whole bar from life. My bar couldn't disconnect from that. And then basically... Then I got on that and I said, I contacted them back the next day and I said the ceiling's still too wet to actually reconnect that back up, it would be dangerous. So you still have no electric? You're going to need to let it dry out before you come and reconnect it all back up. Then I got another phone call from them saying that now they believe the leak is coming from 117 which is the third floor up in the building. The persons, because it's privately leased, they're going to come down and speak to Simon today. So I said, alright, no problem, because they've got to then pay for the damage that was done. So, people from 117 come down and they say, can I drop my lease? And they say, I'm going to come out and check. Show how uncertain it is. Basically there's literally no leak. Simon. Simon. Thank you. Thank you. So I've contacted the council and I said to the council 117 is saying there's no leak. Thank you very much. Thank you. Where were they from? They're independent. So the idea is that they're not... When the panel went up there, the gentleman said, "It's like she's swimming in the water." So, as you see, it's a bit deeper. So, as she goes there, it's... And it all went into that back... See, I'm a stranger. But, you know, the council was not even digging that. What's happened is, this engine's been shut down and locked down for three years. That one is too disrespectful and it's crushed it for all of them and that one is ruined over there. And then they're trying to start this one back up over here to get the thing but this one over here understands what just happened and the violation that happened in the beginning. So now it's a nice problem floating the whole thing again and getting it to carry back up to help everybody do what it was supposed to do in the beginning. That's basically what's happening. It's because people

are too busy chasing because there is a challenge behind somebody that is smart to get them initially in the beginning. I went into the Civic Centre all my life asking them for advice, not understanding what the Civic Centre was really about, it's a place that's got problems with the link. Now I'm older and what they've done is they've sent me away, they've not even shown me where the ticket machines were when I was trying to build all this, sending me out to meet the people. But then eventually, when I'm older and I'm right in the institution and I'm right in all the rooms, I understand what they're really for and I understand that they've got the legal department, they're supposed to have work space in there and vehicles for me to go in there. They've got to be able to buy it, and that's what they should have done, but they sent it this way in the beginning. I used to walk in there every week. I went to every business, the business pays up and ask them for their help and support in going forward. But they'd always dismiss me and say, go back to the Civic Centre. I'm sorry to interrupt, but I'll just give you the paperwork around the wallets. You've got a copy of that. So this is your copy. Can I take that please? And the police left this as well to say that they've been here. So do you want to hang on to those?

Excellent, thank you very much. Okay, so unless there's anything else, I think we can leave it there. So Goody will contact him when he comes back off a holiday to set a date up?

Yes, to set a time up.

Will he be his main form of contact?

Yes. You can still call me Simon. You can find her now and to meet with her. You can arrange a meeting with me again. I do have a problem I won't contact you. I won't be scared to find you and speak to you.

Would you be okay to meet with our doctor as well at some point?

Again, just to see how things go. Just to have an appointment to go. Basically for an appointment.

No, no. If you could just phone and let him know when they come in at the time. He just don't like people turning out the door.

Yes. This will be but sometimes you see someone on the side and it gives you a clear line. This was an emergency assessment in a stressful situation. Going into a relaxed situation of this was a more detailed assessment. The doctor can then say who does - Yeah. - They are? Okay. So I've got really, I know it's a horrible experience having all these strangers coming home. I'm glad to meet her, go to the face of the news, but it's a problem.

You cope remarkably well with this.

I'm not worried about asking if the word Warren and Paige was more... I felt an amount of it. Thank you very much. I know that you don't need this but I think in the long term it will help you to get this assessment done.

So if you get your letters, get them done.

Yes, and Mal or Goody will organise the appointment for you.

Wonderful. Thank you very much. Take care. Bye bye now. - Oh.
