Transcription

How you doing? May I ask who I'm speaking to please? Yes, Louisa. Louisa, how you doing? It's Mr. Cordell phoning, Simon Cordell. And I've got large concerns that I'm in process of suing the company that you represent for already. They're going through the process. I'm going through early resolution in regards to suing about employees.

And negligence and gross misconduct.

I just received another letter which has been sent to me fraudulently. They're saying loads of stuff about me, about diagnosis of unexpected and organic psychosis and stuff. I've never been diagnosed with anything in my whole life or had any problems. I'd just like to be able to speak to a gentleman called Subha Appadhu. I won't really call him a gentleman.

- Oh, Subha.

- Yeah, Subha. Is it possible to speak to Subha?

- Okay, is my mate? - Yeah, Mr. Cordell. Simon Cordell. Who is the bus line manager may I ask as well is it? Mr G Ben Y R U R E? Ben Ure, yes. Is he available at the present Ben Ure? No he isn't at the present. Ok, well I'd just like to make it noted for a fact here that I've basically, I've took all this information from the computers, I've put them in my FOIs and I've got every note that's been set by you, by the staff, other staff that represent the company you do, Louise, and I've basically put in fraudulent claims against you, like now suing the company. I'm going through early resolution to do that, I've spoke to all the highest team managers and that. In them departments and recorded the conversations. I've built a complete portfolio and I believe that very shortly them offices are going to get ripped apart by a special investigation taking place because I'm going public on my website and I just want Subbu and I want Ben, why are you a team and all that, leader, because all their names are covered in what they've done to me and to my name and my definition of character. I'm not happy for them to be writing to my doctors. These people shouldn't even be employees for the company at the present with the drafted website that I've put up already. - I know. Company with the NHS. Yeah you're a trust, you're a trust, you're not an association, there's six different things that you can be, company structures, one's a limited company, CIC, community. No, no, no, we're under the NHS. Yeah, you're a trust, you're NHS trust, you're NHS, you're a trust, there's six different company structures that any person can have and them six different company structures are, one a limited company, two a CIC, community interest company, three an association, four which is what you used are, which is a trust, No, we're not a trust-based company. Yeah but where it says it's Barnet Enfield and Haringey Mental Health, NHS Trust, NHS Trust, a university teaching trust, there's only... Yeah that's right yeah. Yeah you're a trust, this company when it's built it's built with a memorandum of articles of association so you have an article, a document that says articles of association and you have a memorandum of, with that capital in share under the 1963 Act and what happened is people will come along like and they will sign the directors act and what they do is they buy assets for the company they don't own nothing to do with the company this company is set up as a trust it is a company it's an organisation that is a trust I understand the ins and outs of it backwards ultimately let's get so instead of us discussing what kind of company or what company we are organisation you are what sort of organisation all six of them are organisations either way so you've run up to speak to super and super's not here Yeah, or to one of his line managers. Right, would you like me to leave a message for both Zuba and his

manager to say that you've called, yeah? Can you tell Mr. Can you just make sure that they know, it's a blatant fact, that they're writing to my doctors, they're writing that they've got, I've got previous diagnosis. Yeah, but we do write to all our patients. No, but I've got all of the doctors' notes that they've got, and what they've done is abuse of process and malicious prosecution. What they've done is they've frauded everything in the beginning, then what they've done is, before they've even, I've never been assessed with a mental health illness in my whole life. There's 900 days, 900 days since 2014 since I got put on this curfew in my house, which is a legally done nine year curfew, I never got arrested, nothing else, I'm not allowed that, man. These doctors and all that collaborated together There's a collective of people all talking in joint circular throughout the computers. I've stripped the computers to forums and they're all talking about how they're going to get me onto tablets, they're going to do this, they're helping each other trying to get away with the intervention of the course of justice which is 1963. Perjury and the rest of it 1911 yeah. What they're doing is so highly illegal, their feet ain't gonna, I'm gonna get them a hundred years each and their feet ain't gonna touch the ground by the time I'm finished with them. They've been talking in the forum every day behind my back while I've been sitting in this house planning how they're gonna ruin my life, yeah? How they're gonna get me on tablets, they're gonna do this to me, that everything that I'm saying is a conspiracy and that the reason they're doing this is to me is because I'm delusional because I'm saying that there's a conspiracy being set out against me by the Metropolitan Police and by the Enfield Council and now because I'm also involving the NHS involved in it before I even got to hospital yes and all the hospitals refused to even have access to me The police station knew that they were in the wrong, started trying to get a private bed. Eventually, Junior Klinich for St Anne's Hospital agreed to take me in that hospital, yeah? They brought me in there. Before I even got there, they had done a drugs chart. They put six of the worst drug medications you could have. One of these things. One of these things. One of these things, one of these tablets is bad enough to kill someone let alone putting someone on six different tablets trying to force the tablets down my throat yeah telling me if I don't take these tablets now I'm never gonna get released again yeah I was on an assessment wing yeah not even a treatment wing I'd never been diagnosed with nothing in my whole entire life even till now they're planning in the forum every day yeah we've got to go and get some how many times I've recorded them not coming in I've got over 50 recordings of them coming into my house Do you know how many recordings I've got of your call centres? I'm even recording this conversation now. I've transcribed every recording up completely that I've ever had with yous lot, yeah? Every meeting that I've ever had with any of these staff, I've transcribed them all up. I've put them all in a diary, all of their notes in diary format in organising. I've built brand new books for them, PDF books. I'm coming to stand up for my rights and I'm telling you, that dipa, yous lot, them staff that I'm talking about, super, should never ever be allowed to look after another person ever again under the 1981. Social care workers act and they should never listen to this I'm telling you I'll rip them pieces I'll rip them listen I'm telling you Louise it ain't your fault what's happened here but can you please send them a message what they're sending to my doctor what they're sending to my doctor I will never use my own doctors ever again because of the abusive process to which they've done Bullying my doctor to call me in for mental health meetings when they've never been... They set me up in the beginning. No, they set me up in the beginning. There's no signatures to none of the ASBO or nothing. They all forged. Every police officer has done four statements each, five of them. They've changed... 26th of the 1st 1981. They think that I'm going to back off and lay down here now. They're going to write all these malicious things about me that I've fraudulently done under the Companies Act 2006. And they think that I'm going to sit here timid and afraid of them because of how many of them there are. Yeah? And listen, send them all to my house now, yeah? And I'll show them a report that will

make them never touch the floor. Do you know how many doctors have run out of my house because I've shown them my paperwork? I've shown them my paperwork. They've run out of my house. Send them to my ass and I will ruin their lives, I'm telling you. And I'm coming to get the ones that touched me. Every single one of them that's in them files, tell them Simon's coming to get you. Yeah, I'm going to ruin their lives for this. I'm striking them off the registry, yeah? I'm sorry, Louise. I'm going to go and let you have it. Louise, I think you've got the gist of this conversation. I'm sorry that you don't pay. You don't even pay to have to deal with stuff like this. What do you... Tell Simon, if they ever write, tell them Simon said you ever write anything about his name again, he's coming to get you already for you, and anything else is just going to add on to his case to help him get there. I'm wiping them of their jobs. I don't want none of them to be employed by this trust ever again. I'm coming to get my money from that trust for what I've lost and the damage that they've done to my life, yeah? I'm going to rip that place to pieces. If they've got anybody that thinks I'm acting psychologically, mentally impaired or ill, send them to my front door and see what happens to them as well, yeah? Simon, hang on, Simon, just stop for a moment, take a breath. I'm sorry, madam. No, no, no, no, I just want to understand where we're at with this, because from what I can see on the records, you're not under our service anymore. Yeah, because they're shook, because of what I've got proof of. They were the ones signing it off, but they've been... No, no, no, no, that's good. So we're both in agreement that you've been discharged from service, but what do you want from us now? I want my money back and I want reprimand to the people that touched my life and that I can prove negligence and gross misconduct against. First of all, with money... The Resolution, NHS Resolution, who's, NHS Resolution gave me the insurance policy, they've told me that they're insured to unlimited amount of insurance, they've told me, they've told me, send my report over to them and I'm going to get my money. I'm sending my report over to these, and these are still writing about me behind my back. I was just about to say to you, that's the best way to do it, we need a letter. I'm sending it over, I'm putting it online first so I'll make sure that everyone's watching what happens and I'm sending you that paperwork and I'm telling you... There's 15, just in there, just in there, what they've wrote, they've wrote 15,000 pages that I've stripped out of the computers about me. Do you know, do you know in 2014, in 2014, so if you've been reading, this all started because they let all my neighbours start attacking me and I never done nothing, I never had no disease or nothing because of this ASBO, they started using my missus, yeah? Do you know what clocks it? In 14, in 14, Enfield Council wrote to the, wrote to, Enfield Council wrote to the NHS and asked the NHS, it's Simon Lowen to Simon, Simon, I'm asking you to stop talking, I'll tell you why, because you're going to want you telling me everything on the phone, but there's nothing I can do with it. I appreciate it, thank you Louise, I'm sorry, I'm going to go and I'm going to... Your best bet, your best bet, no, no, no, no, the best, it's not about you going on, I think the best thing is to put it all down in a letter and send it to... To St Anne's Hospital. I'm not letting them update. It's going straight to St Anne's and I've sent it to the Independent Advocacy. The Independent NHS Advocacy. The Independent NHS Advocacy. And them ain't touching their hands on it. They're all getting lined up. I'm going to line them all up properly for this. God bless you. Have a good day, madam. I think really, the best way forward... I've already done that, I've already done that, I've done that. There's 15,000 pages just to what they've wrote in their evidence. In 14, now do you know what happened? Listen to this madam, in 14, madam, I am listening to you, I am listening to you, I've already done what you're telling me to do. I'm miles in front, I'm telling you what I've done, yeah? In 2014, Enfield Council wrote to them doctors because they were in trouble and said, "Is Simon known to NHS?" The doctors said he's not known, he's never been known. This was on the 23rd of September 2015. Then on the 24th... I understand, but you're close to Shibu and that, and they're still writing to my doctors. I can't

even go there and get medical treatment anymore because of how they've acted. Tell them to stop writing to my bloody... They write to my doctors again, I swear to God, I'm going to make their heads spin fast. Their feet ain't touching the ground as it is again after this. I appreciate that, I'm going to go madam, I'm sorry, I'm sorry, I'm glad that I spoke to you today rather than anybody else to be honest, and I'm sorry that I've... I can't turn the phone, no, I can't turn the phone for too long because it's switchable, I've got other calls coming. Yeah, I can appreciate that, I can appreciate that fully. I think the best thing to do, Prime Minister, is to send a letter in with everything that you're not happy about, to either George or to Super, It's not going to the... It's going to the private NHS advocacy. And I'm sending... I'm going to the European Convention and I'm going to let the European table deal with it rather than let these courts deal. I don't want these courts touching it. I'm going to make sure these lot suffer for what they've done. God bless you, madam. God bless you, madam. God bless you. Bye. And you too. Bye.
