It's the 1st to the 3rd, 2021. Gonna call David at Kinnock from DAC Beach. See what happens.

Hello, this is David Knap. I'm sorry I'm away from my desk at the moment. Please try and call me later or leave a voicemail. Or if you need to get hold of me urgently, please call my secretary, Kat Christie, via the switchboard. Thanks so much.

After the tone, please record your message. When you're finished recording, hang up or press the hash key.

Hello David, it's Mr Cordell. I was just phoning in respect to the claim that I'm making. It's 14-21-01-03-2021 and basically I spoke to you the other day on the phone. I gave you an update to where I was at and in rough and that I've been making the claim letter of claim on server1.hop2.org hop2.org forward slash claim percentage sign 20 example claim and example are both capitals I've been updating that there and explaining the laws and what's not. I've had issues, I'm waiting for a new laptop to be delivered today or a fresh laptop to be delivered today with dictate on it so that I can speak and get typed by the computer. In privacy because my main machine is up against one of my neighbours walls who continuously attacks me with a drill and the rest of it as I've got video evidence that I'm going to host soon. So I feel uncomfortable speaking aloud to Google or anything and it forces me to have to do a lot of typing which I have difficulties in doing. So with the laptop I can sit in my hallway and lock myself in there where I've got a little bit of privacy maybe, other than the neighbour upstairs who attacks me. But I can work in there a bit easier with a laptop and not cause myself so much problems of people listening to my defence that I'm building against them and then them simultaneously attacking me in respect of that. So basically I'm waiting for the laptop to come so I can actually work without getting hurt physically or mentally. And I have gave you an update and a link last time in the recording which is hosted under audio. If you go through the audio as I explained and then click on control F once you're in the file. If you write D-A-C it'll bring up all the audio and our last conversation and the rest of it. Basically that's where I'm at so far. I'm still doing the work. That's necessary or you request of me to be able to complete my claim and I hopefully will speak to you soon or you will contact me because it would be nice to get an update that you did go to the site and that you have overseen it or that you did go to where the letter of claim is at.

And you have overseen it. I did update it also. Last time I explained about the headers being at the bottom, which is all the subjects from the emails and the applications put against me and that are one. They're all there. I've also put a load of the diary links in there. I'm just waiting for a load more emails to come also today that were sent along in 19 and in 20. So 21's been quite quiet other than me talking to yourself. So, we're only three months into it. So, I basically am going to be updating, overlaying an update over the 19-20 and then I'm going to upload it onto the server and then I'm going to split them, as you're saying, so that I can say, well, the council says.

As far as I'm concerned, when it comes to, like, as a statement or a letter explaining these things, I'm allowed to show you an impact statement. You've got a victim statement, witness statement, you've got an impact statement, which is obviously the cause of what was caused beforehand, but what's been caused to me because of people's actions that were wrong against me. So obviously I've got the actual definition of the days and when people done things, but

then there's also... The fact that the impact that they caused me, which is a large part of what I'm doing now, like filling in 19, because obviously I'm still suffering today, as I explained, with my neighbours and the rest of it. So, well, I'm going to leave it at that, and hopefully soon you'll either email me back and give me an update that you've over-viewed some of this, and what else you might request.

I'm pretty shocked you haven't, to be honest. Or if not, I suspect I'll be in contact with the document ready or with another update to where I'm at in compiling it.

All right, thank you, and I'll speak to you shortly. Bye.
