Transcription

Hello, how are you doing? I was wondering if you could help me. I'm trying to find some information. I was detained from my house by some doctors and taken to St Anne's Hospital. And I basically want to know who them doctors are that detained me. I know their first names, but I can't find their surnames. I was wondering if you could help me find them on Rio.

I wouldn't, you don't know the surname? Do you know the name of the park?

I thought that they might have worked at... They had association to Lucas House possibly. I'm not too sure what department they could be from. They could be anywhere. I just know that they should be on the medical records and by law I should be able to find who they are.

Okay, do you want me to put you through to medical records? Maybe you can ask them for some information? Is that possible? What is medical records in regards to personal, public data or in regards to staff data or both? Personal details and... Would that be acceptable?

Thank you, yeah, I'd appreciate that. One moment, let me just try it with them first, yeah, one moment. Okay. Hello, how are you doing? Hello? Hello, how are you doing? I'm alright. Who am I speaking to please? My name is Mr. Cordell, Simon Cordell.

Alright, and where are you calling from? I'm calling from my home. Alright, okay. How can I help you? Today I'm trying to find out some personal information in regards to my medical records that are contained on Rio that are held within your general offices. I was wondering if you could help me do that. Are you still being seen in the hospital or are you being discharged?

No, I was assessed and assessed as to be well.

When was the last time you were seen? When was the last time that I was seen in the hospital?

Give me just one second. I got detained in the hospital on... Give me one second. No, it was last year. Home treatment team came to my home and one, three, five, sorry, I'm just going through this a little bit. Don't worry about it.

So you've been seen by the home treatment team, have you?

Yes, the home treatment team came to my house and put a section two on to me and then I went through tribunal.

And you just requested...

Yes, I would like to know the doctors and the paratricians that actually came to my house. And the doctors, I know their first names, but I'm not too sure of their last names.

Right, okay. Have you got access to your computer?

If I give you the email address, you can send your request. I have a problem with reading and writing so under the Disability Act, under the Disability Act I was just asking for your help and your assistance in doing this under your statutory duties I was asking for you to act as a reasonable person and understand my disability.

Right, in that case I'm going to give you a number, let me just take some details from you, okay?

My date of birth is the 26th of the 1st, 1981. And what is your first name?

My first name is Simon. Simon. And what is your surname?

My Christian name is Paul and my surname is called El. Paul is P-A-U-C-O-R-D-E-L-L.

Yes, that's correct.

And what is your home address?

My home address is 109 Burncroft Avenue.

Yeah, B Barencroft Avenue, Echo, November 3, 7 Juliet, Quebec. I've got video cameras in all of my rooms, in my front room, in my kitchen and everything. And I recorded the last time that the doctors come into my house and they falsified the section 135 and illegally detained me. Julia Krinic was my case handler. And she is the director of St Anne's Hospital. I've drafted a full official report in regards to everything. I did hand it to an NHS complaints advocacy and they were quite wary of sending it across and said that they wanted to follow my lead. I said that I needed some more time to go over everything and I've been drafting up. The backlash after what's happened after what they've done to me and other things that happened. I would like to be able to forward this eventually to Julia Krinic and to other departments as well because I feel that was a...

I understand 100% that I was illegally detained. And I was forced into going home and being told that I have to have home treatment under section 117 and I was forced to force medication under the prescribed medication act 2012 when no person has to really see it, have section 117 when they've got section 2 only section 3 mental health patients do have to do this Every time they were sending the doctors to my house, I was recording them and I was explaining this to them on every visit. Eventually, after about a week, they stopped the visits, but I was still being forced medication down my throat. The first day I got to the hospital, I was forced medication under assessment and I was right that I was found not guilty for the threats to kill that initially got me brought there. And I was held for much longer than ever necessary at the time and I broke my right finger I asked for the medical for it to be noted in the medical books or to be taken out for an x-ray and no one would take me out of hospital or to an x-ray machine now my right hand has completely healed incorrect and I have a problem writing with my right hand I'm practically disabled in my right hand and you can see that on the records of me asking for them to put it in the accident report book. I was prescribed ibrutine. Rosemary May, an ST4 consultant, has drafted it all in her reports as well. So there is no mistakes in regards to this. I've had a mixture of things. In between all of them, what initially happened is the police served me an ASBO application and that ASBO application said the organisation of a legal race. They forgot to arrest me for something that was illegal. So I knew that I hadn't committed these little six of parties that have been thrown

in this ASBO in layman terms, yeah? Now what initially happened, them six parties, I'd been on curfew while they had happened for another case that I won so I didn't throw these parties. So I went to Facebook and copied the Facebook profiles, these things called event pages that they put up here. And so I've got the Facebook profiles proving they're not my events. Then I went to court and said you've got no right in doing this to me and I'm not a super grass and I'm not doing your line of investigations and that you forgot to arrest me. The judge couldn't prove a legal ality in court that anything illegal had happened but she still gave me a 7 year ASBO. Now the maximum sentence if I did get arrested for the organisation of a legal race is 6 months. So even though they didn't have enough evidence for a criminal conviction, somehow they've gave me 7 years in my house illegally holding me, plus the year curfew before. Now they started phoning used doctors and winding the doctors up. Now the doctors come and they've paid me 126 visits while I'm being illegally detained in my flat. Every time I phone the police station on 999 they tell me I'm a black bastard, I've been robbed down the phone and I record all the conversations. Like I've recorded these conversations and I'm going to transcribe this up and put it into my official report as well. They caused a sex scandal in mine and my partner's name even though we've never ever argued. And we've never had a problem. I've got all my hospital medical notes from the sex clinics and when I was in your hospital... I noticed that there was a sex clinic there and I asked your doctors to also check my records which proved that I come back as clean. There was never, I had my blood test done, there was never nothing wrong with me. Now I've got the initial clinic that done all these serology tests on recording, admitting that they've sent me a formal letter of apology. But the damage that's been done in my name and to my definition of character and to my right hand and the time that I got detained in that hospital illegally, I feel is unfair.

Did you contact anybody in the hospital before staying? Did you?

No, when I was in the offices in St Anne's, I got access into the, because I called all the meetings in the hospital, I noticed there was no first aid book, so I got the first aid book, I noticed that they was missing all the safer food, so I got that, I got a sanitary policy for the toilets, I started pulling the strings trying to show people that I know what I'm doing, yeah, and then basically I ended up in the offices and I ended up on Rio in the country. Then we can't be i can't do very much for you because i could i have to put the course to somebody else if you if you um call switchboard and ask them to put you through to the hub and what is the hub may i ask uh the hobbies you know if you need help they are the first person to help you But if you are for to deal with medical records, you deal with my personal record that is held on date on Rio. And I'm requesting, if I have to put a subject access request in and rip them computers to pieces and put freedom of information request in, that company head that you're there... A subject access request in regards to all information that's contained on Rio and I'm going to amend all of the records that are on there and all the inaccuracies that are on there 100% which is my intention from the beginning. You can send your application and I mean I can send you a form you can complete it and send it back to us Yeah, I was just seeing if we could do things on more of a formal basis. All I was requesting is the petitioners that have come into my house and spoke to me, their first names and their second names. I'm recording this conversation and under your stationary duties for you to be a reasonable person in law so that you couldn't be sued. Yeah, I could pass all security checks with you now and you can tell me the doctors that dealt with me. Well I can appreciate that. But who is your line manager that can do that? Who is your line manager? Or can you pass me to Julia Krynich directly herself, the director? Or can you pass me to an executive director please that is in charge of my personal data that can release me this information now? Switchboard is below and you deal with this, so you must have a line manager that is available beside you or

you must have an executive director that can authorise this information to be released. I can give you the court manager's number. The hospital manager's number. No, the medical records manager, if you want to speak to her.

I'm school yeah whoo I'm 7702 for
