Transcription

I was trying to make some general inquiries. I was trying to find out how I can bring a case back into the Supreme Court for independent review, joystick or review, because of it's had an error in law and it's holding me basically hostage in my house illegally. It was fraudulently made. And I can prove the fraudulent error. Errors. Okay, well this is the Supreme Court. We're the final stage in our justice system. Yes, that's correct. I've been through J.R. And I've been through everything else and the executive director, I've got lots of recordings of evidence, she falsified an ASBO application which was called the Organisation of Illegal Raves. When she signed it all, Sarah Gilhart-Christ, under Sarah Gilhart's solicitor firm, she basically, when she was patronising it, indexing it, she was putting away what's hearsay evidence and what is normal evidence she put down twenty police officers all the highest ranking as as hearsay evidence so the case relies solely on hearsay which I know by law it's not under Hyerby and Isleton 2007 the commissioner of police it's against the law for a case.

Okay, so if you could just stop me for a moment. If you want to bring a case to the Supreme Court you need to speak to our registry department. Because we're in recess at the moment they're not going to reopen until the 10th of January so they won't be able to take any calls until then So if you want to bring a case here, you would need to bring us back after that, I'm afraid.

Okay, I understand that and I'm grateful for your advice. I've got the registry number here and I've already listened to the person. Because they've never got the members of the public to sign the signatures on the MG11 form, so there's no members of the public. They've falsified it. I've been phoning them, recording them, explaining to them different ways that we can go about having this rectified. They can call an EGM meeting and they can go in themselves and under trespass, because they never proved trespass, the illegality in the case, they could have dropped it, but she's refusing to do that. She's leaving me hostage in my house. I keep having heart attacks. I've got videos in every room and they keep attacking me. I'm really sorry, I can't comment on this any further after this. How can I go about in, say there was an emergency issue right now where someone's life is in threat and it's an EGM, a fatal error in the law and I'm being held captive by a stationary people, by stationary duties being breached and the reasonable people using their abuse of position and now I'm being held captive and there's no signatures on the paperwork. There's no members of the public wanting to accept the thing. How can I actually make this happen today and get a court, or tomorrow and get an emergency judge to get up and to take this application and deal with it? As, as... Just a moment, I'm just going to pass over to my colleague. Okay, thank you. Good afternoon, Supreme Court. Hello, how are you doing? Who am I speaking to? You're speaking to Sarah. I work in the education and outreach team. How can I help? I've had a few issues, Sarah. Basically, in 2013, I basically got put on stringent bowel conditions. I had my passport taken off me, I'd ever think, yeah? I was kept in my house, basically. I won the case after a year at court. This caused me serious financial, economic losses. It caused me damages in my life and everything like that, yeah? With my personal life, yeah? So I lost my partner of 13 years. I left my house and I basically won the case just at the beginning of 14. I got released. Two months into it I met a new partner. I started to live with my new partner and we was happy for eight months. At the same time as this was going on I got served an application outside my front door. It was an ASBO application. I looked through the ASBO application. It accused me of being six people that I wasn't. Three of them could be your children. They were younger people that I don't know. And three of them were associates of mine in the past.

Yeah, but I'd been doing lots of good things for the community. I had the keys to my community hall while I was kept on curfew for the first one. I was working for lock to lock festivals, Cella Palsy, doing kids with Cella Palsy. I was doing everything in my community. Yeah. And then basically when I was, so I knew I hadn't done nothing wrong over the 13 to 14 while I was on the bowel conditions for the first case. I wasn't, I wouldn't have won it. And then basically, After meeting this partner for eight months, they threw an ASBO outside my front door. I looked in it, it accused me of being basically a load of people. So I went to Facebook and I copied the Facebook profiles out of the events proving I'd never done this. So I knew straight away I had the evidence proving it wasn't me. Yeah, and I wasn't the organiser of these events. I read through the paperwork and I noticed that trespass hadn't been, all the police officers in their own statement said that there were sections on the doors. And because of this, it becomes a private place of residence and there needs to be a breach under the Licensing Act 2003. So under Apex 4 of the Licensing Act, it says personal homes and back gardens are not against the law. You don't have to have a license in place unless you want to make commercial business and you're making money. It's not against the law to make money on the door, but if you have intentions of making profit, then it becomes illegal and a place of residence. So throughout the whole application, they never talked about money. Which is what their line of investigation should have been. So I went there and I said, well, I'm not going to be a grass and grassy people. I'm not giving them the Facebook profiles. I showed Sally in the things, I've got these Facebook profiles and you're not setting me up. I said, I went there and the judge couldn't prove a legalality. At first, they tried to get four or five judges on me. At first, I got served in 14 for the injunction, with the injunction. They couldn't get the injunction, the ASBO on me or the conditions for the injunction until 2015. Four judges kept throwing the application at different judges and walked out. I've got all their names and every judge in every courtroom all marked out in a report. I've done a diary for every day, yeah? And then, basically, what initially happened is the judges kept throwing it at us, saying no. Then, all of a sudden, they darkened my name, used my personal information and lied and said some rubbish about me, which I've got all the recordings in my medical notes and I've never argued with my partner. Me and my partner still talk. Yeah, we're still good friends, we've never argued, I've got all the SMS texts and everything, yeah? So what Sally Gilhurst has done is she turned my name into a bad name and then she got a rapist judge called Judge Pigger who deals with child offenders to oversee my case. Now, this was only a civil court case, like it's civil matters, it's a standalone ASBO, even though they called it the Organisation of Illegal Rapes, yeah? So I went to court and I explained, I went to court anyway and she threw a five-year ASBO on me plus the two years for the injunction order. So I'd done seven years for that plus I read a year for the gazebo case before which I won. So that's eight years of my life, yeah. So I got upset because she couldn't prove a legal ality and when I got the copy of the court transcripts, all the coppers were getting off going, we copied this out of Sergeant King's notes and They're all getting in trouble, you know, the disciplinary action. My barrister's having a go. You're all here saying none of you were even at the event. 15 coppers, this is out of order, yeah? What you're doing, the judge still set me up and gave me the ASBO, yeah? And you can't prove a legalality. The judge admitted she couldn't prove a legalality, but she still gave it to me. I went home now, because I'd wrote a really nice report where I wouldn't grass my friends up.

This that i understand the laws of trespass in the land i live with understand the nominal laws understand my magna car and i understand my human rights everyone on my continental understand the laws but in any personal met so far you have studied them hard on their own all the barristers say it someone with study the one life so we don't know no one with which i was to be honest that you know more than us about everything yeah i know every part of my

heart and there ain't a law to look after everybody. Yeah, and every statutory duty, every regulation conditions, I know it. Yeah, I read everyone's paperwork. I wrote all new posts. What actually happened is, Sally Gilhurst, now when I went back after doing all that, I got upset and I started looking for the application. And I noticed that Maureen Reggies, I noticed that all the call centres, 999 call centres, timestamps went backwards, the CAD numbers, So say at 12 o'clock, under NSI, Home Office Counting Rules, these things are, under CD, Communication Data, they should all be recorded, and under Regulations 2000 that, yeah? Now these things here shouldn't be tampered with, they're very serious things, they breach our human rights when they're tampered with. Some, basically, I both for instance. Now I noticed in the CAD, CAD 500 has a timestamp of 1 o'clock, then CAD number 560 has a timestamp of 12 o'clock and this kept happening through all the paperwork. None of them had URN numbers on the paperwork where they're supposed to be interlinked through processing. I asked for them to be done. I asked for the recordings, audio of the and they said it's all been destroyed. It's not allowed to be destroyed for 50 years. I asked for a copy of the PNC book to be disclosed under MG6, yeah, and undisclosed information. They said that they ain't got no pocket notebooks, yeah. Now, I got really upset now when I understood that they've destroyed all these recordings, they've destroyed the notebooks, and I noticed things like, I looked at the which are the witness statements forms and there's no signatures on none of them. So there's no members of the public. Sally Gilhurst has omitted this in her right of saying you have no members of the public who wanted to sign witness statements and Mr. Kordell believes that there's a magnanimity are true, the CADs are wrong in numbers and if this is true the conspiracy would be so big on the metropolitan side it just can't be true. I've been through 20 court cases, appeals and everything. Every time I go to court they make the solicitor run away the next day, so I have to go on that litigant on my own. I don't think it's fair. I had legal aid granted for this case. Now I've been held in my house since 2004, I've been recording Sally Gilhurst all the time saying well look, you look at CAD number 500, forget the timestamps are wrong and forget that you've got no signatures and no first hand evidence you look at CAD number 500 it says that the 999 caller said at 10 o'clock He phoned the police on a Friday. He says, okay, all white people and white females are entering the building. I believe they're going to have a raid. Inspector Skinner goes to the building. He surrounds the building and don't let nobody in and out. He's got everyone in the building. He does name checks and all car registrations. I've got every car and every name of everyone in there, all the white people that was in the building. He had them from 10 o'clock. One of them people was Anthony Harris, one of the boys that got down for Andrew Rio's death. And he was on bowel conditions not to throw no more parties. I was on curfew all this time, so I couldn't have done all of it. So now I've gone down to, they've got Anthony Harris in this building on bowel conditions, throwing his own party. I don't even know who this Anthony Harris is, one of the youngest I was protecting that I've fed up now because I don't want to wait another three years, they said I've got to sit in another three years, yeah, until 2020 this is all over. But basically now, what I noticed, I went to the building at 3 o'clock in the morning, Inspector Skinner de-arrested Anthony Harris and everyone that he had at 10 o'clock and arrested me outside the gates knowing I couldn't get into the building or nothing. And they set me up in the paperwork again. You can prove it very easy. I've even spoke to Annie Harris now. Now all of us What initially happened is, Jane Johnson, who's the commanding borough, she's now been put into royal diplomatic protection. I was phoning asking, "They're dead, yeah, you're right." But I've tried to protect them. This is the way forward for them. And I've just phoned Sally Gilhurst, the less than an hour ago, and told her, "Look, Sally, take hold of the reins. I've recorded you, all the reins. Just call an EGM meeting back under the company head. Just accept there was an error in law and the trespass went wrong, that you didn't... That you accepted that trespass wasn't present in these buildings, and release me."

The reason I want the conditions released is because you're holding me in my house after 10 o'clock, a seven year curfew before 10 o'clock. Your Supreme Court dealt with counter-terrorism, it's in your documentary where people are getting held in their house illegally, at minute 46 in your film, in the documentary, with Prince Philip and all that, and all the rest of it when they're in their homes, and it shows that you don't allow people to be held in their houses like this. I've had to write four years so far, Yeah, and I'm not allowed to leave. I can't leave my house before 10 o'clock because if I leave before 10 o'clock before my curfew, these are all avoiding disciplinary action. I've caught them all and I've reported this and it's all in the response bundle. I've got a response bundle 600 pages long here. Now, what made it even worse is, yeah, I know it's a lot I'm going through with you. Now, what made it worse is Steve Earls, Jane Johnson's told Steve Earls not to do this. As a gold commander, she can change the computer ID. She's allowed to do that. Yeah, but she can, there's certain things that she can't amend within the PNC here, and her paper chase was left there for amending it. So I kept phoning the call centre and asking for their help, and they go, no, you're a black bastard recording that. They go, no, you're a black bastard, you're being robbed. So I put the phone down after recording it. I kept saying, who's Stephen Ellsmore's lines manager? No one would tell me that it's an Aaron Thompson, Sergeant Aaron Thompson. Now eventually I got someone to phone me back and Aaron Thompson's phoned me back, I didn't know it was him. Now I've gone through all the lists with Aaron Thompson on the phone in 14 and he didn't tell me he's Steve Ellsmore's line manager. Now a couple of phone calls later speaking to the call centre again, please get me out my house, you can't be doing this to me and Shannon, we've never argued, Shannon's mum's killed herself and everything, yeah. They banged through my nan's death, they let all my neighbours attack her, I was building a model constitution in my CIC company. I got 100% in traditional words, 100% in grammar. I worked hard, yeah. I studied hard to look after the people and look after myself, yeah. And they've done this to me, yeah. Now, what Steve Ellsmore's done in the computer, he's gone and got all the inspectors who were pulling me over on a normal day. Now, all them reports were normal things, like pulling me over on a Thursday on Alma Road, 12 o'clock. He said he's building a festival and he's bought a couple of sound systems. Then what he's done is, instead of just copying and taking them out of the PNC and putting them straight into the computer, he's opened and edited them. The evidence and in tampering the evidence he's now edited it and he's added an R and he said it's part of a black boy occupation and he lives on Brian Croft Avenue, scribbled it all in on the edit and then they put that in the application. Then what makes it even worse is all of the CAD numbers, there was two parties on the same day, one on the 7th, the only one that hasn't, the whole reason that this is happening on one weekend, on the 7th of June 2014, there was a party at Progress Way, which is off the Great Cambridge, Lincoln Road, Edmonton, North London. Now what initially happened is, prior to that I'd been on curfew, there's another road, Southbury Road. I'm recording this conversation as well, and I'm going to transcribe this up and it's going to be put into my official report.

And I'm going to be serving you, I've recorded everything, and I don't make a bow, I want this dealt with, I'm not being held hostage in my house, illegally, because of fraudulent activity within the company heads.

I appreciate you telling me your account of things. As my colleague mentioned to you, the Supreme Court, first and foremost, it only deals with ongoing cases. We hear appeals that your case needs to have gone to the High Court. It has already. Or the Court of Appeal. And also, the department that deals with this, they're actually... I'll wait till the 15th, you

understand that? you're telling me unfortunately I can't do anything with it I mean I can listen but I can't advise you and I can't do anything with it you're going to have to speak to them but what I would advise you unless you've done this already is to contact inside the Royal Courts of Justice they've got their own Citizens Advice Centre and they give out they you can book an appointment with them and they can give you legal advice If I wanted to act litigant on the case myself, I just want to bring the case before the court, litigant myself, I'm happy to act. I understand the laws that I represent of the land that I live off of. Okay, so if you want to apply as a litigant in person then, you'd need to speak to someone in the registry to see whether you are eligible to make an application and they can talk you through the process if you are. I mean... Yeah, I've got the number, I've got the number for the registration, is that the number that you're going to give to me? The registry, yeah, it's the 1992. Yeah, 1992 or 1991, is that what you're referring to? That's the one, that's the one, yeah. Okay, so I will speak to yourself shortly afterwards, after the 10th, I believe then.

Yeah, exactly. I'm sorry to bring such a burden upon you, it's not something that I would like to bring to your court, and I have tried to resolve it before bringing it to you so that it doesn't cause no problems, but She spent over a million pounds on the application of ASBO holding me in my house illegally. And that's why they won't turn back, even in court when we're asking them, showing them everything, they're saying they don't care. They've spent too much money on the case. And my life's more important than the amount of money they've spent on the case. I've protected their jobs and I've protected them. And they won't do what's right and just release me. And they've got options available. I've been barred from working with any borough I'm not allowed to hire sand to any person. I'm not allowed to hire it to anyone without Enfield Council's permission or personal licence. That's a breach of my human rights. I've wrote to every other council and every other council has said that they've got special licensing departments and that because this is said the organisation of illegal raves, it means that there's an illegal aspect to it and I have to go on a special committee with every borough just to have a temporary event licence or a personal licence. They've all said that there's something wrong with the application and I need to bring it back to Enfield Council. Then Enfield Council has entangled my personal data in a sex scandal. When I've got all my medical notes, all hospital notes and everything proving that there's nothing wrong with me. And they've allowed members of my neighbours to attack me continuously. I continue to record it and ask the police for their response as a CFS call for services. And they continue to neglect their responsibilities towards me. And I've continued to record and document it and the evidence is just horrible to what has actually happened here. I'm going to allow you to continue with your day and I'm grateful that you've took your time to listen to me. You're welcome, you're welcome. Make sure you call next week to see if the registry are able to help you with your... My problem, caseload. Thank you. Goodbye.
